A GUIDE TO MINNESOTA REBATES

Get money to make your grow more efficient.

Xcel Energy, Minnesota Power, and Otter Tail offer cash incentives to Minnesota cannabis cultivators to install energy-efficient equipment.

Here's how it works ---->

LED Grow Lights

If you: a) grow indoors, b) your total canopy is less than 8,000 square feet, AND 3) you are in an existing structure, use the "CEE One-Stop Efficiency Shop."

This program can cover up to 60% of project costs with rebate values based on fixture PPE. 🙌

PPE	Rebate/Watt	PPE	Rebate/Watt
1.9	\$ 0.80	3.0	\$ 0.90
2.0	\$ 0.81	3.1	\$ 0.91
2.1	\$ 0.82	3.2	\$ 0.92
2.2	\$ 0.83	3.3	\$ 0.93
2.3	\$ 0.83	3.4	\$ 0.94
2.4	\$ 0.85	3.5	\$ 0.95
2.5	\$ 0.86	3.6	\$ 0.96
2.6	\$ 0.86	3.7	\$ 0.97
2.7	\$ 0.87	3.8	\$ 0.98
2.8	\$ 0.89	3.9	\$ 0.98
2.9	\$ 0.89	4.0	\$ 1.00

LED Grow Lights

If you grow indoors and your total canopy is greater than 8,000 square feet, or if you are in a new structure, use Xcel Energy's prescriptive program.

- Earn up to \$0.70/Watt installed up to 60% of project costs.
- No preapproval is required.

Greenhouse or under-canopy lighting, HVAC-D, pumps, fans, & controls

Xcel's custom program covers just about everything else.

Rebate levels for any custom project pays out at:

- Up to \$450/system peak kW demand saved + \$200/non-peak kW demand saved

Pre-approval is required.

LED Grow Lights and All Other Equipment

- Minnesota Power pays \$200 per kW saved
- Customer must contribute an amount greater than or equal to the estimated annual first year savings

LED Grow Lights and All Other Equipment

- Otter Tail Power Company pays based on kilowatt-hours of energy saved, kilowatts of demand reduced, and project costs.
- Cap of 75% of project costs or 90% of project incremental costs.

Take-aways:

- Many Minnesota cannabis cultivators have access to cash incentives to improve the energy efficiency of their operations.
- There are various pathways available for applicants in a range of situations.
- Looking for guidance and support? We can help!
